

Law Of Octaves And Entropy

by Samael Aun Weor

GNOSTIC LIBRARY

Today we are going to study this Law and its opposite — the Law of Entropy — which govern all of nature. How to know them and to be able to use them in order to attain our objective of self-realizing in one existence.

Law of Octaves and Law of Entropy

Law of Octaves

Today we are going to study this Law and its opposite — the Law of Entropy — which govern all of nature. How to know them and to be able to use them in order to attain our objective of self-realizing in one existence.

The Law of Octaves teaches us to ascend, shows us where we stagnate, why, and how to be able to keep ascending up to the final goal; how the laws of force function, etc.

The Musical Scale of the Bodies

Nirvana — Direct Path — DO (superior)

SI — Atmic Body

LA — Buddhic Body

SOL — Causal Body

FA — Mental Body

MI — Astral Body

RE — Vital Body

DO — Physical Body

The Law of Octaves, or the Current of Sound, or Current of Life, are the same.

If we observe the musical scale: DO — RE — MI — FA — SOL — LA — SI, we see the seven musical notes. To go from a lower DO to a higher DO it is necessary to elevate one octave more.

This scale we shall call the Current of Life, in which all human beings are directly involved, and at the same time, subjected to it. On beginning to sing a musical scale, DO — RE — MI, when we arrive at MI we find the First Pause, between the notes MI and FA. Then we see that the following three notes — FA — SOL — LA — go together; but on arriving at LA, we find the Second Pause, between LA and SI.

The Current of Sound and the Shocks

DO — First shock — Inhale the first breath at each return.

RE, MI — First pause.

Second shock — Receive the knowledge and begin to practice. First Mountain — "Genesis" — creation of the solar bodies.

FA, SOL, LA — Second pause.

Third shock — Die in Oneself. Second Mountain — "Apocalypse" — Elimination of the Causa-causorum I-s.

SI — Third pause.

Fourth shock — Second Birth.

DO — Third Mountain — Sacrifice for Humanity. Obtain a disciple.

Passing to the note SI, we see that it is independent, and we will find the Third Pause between SI and the upper DO. This implies that we will find three pauses in a musical scale. This same thing happens with all the events of one's life.

The First Shock

It takes place at birth. On being born and inhaling the first breath, when the spark enters the new body, we have the right to the musical notes DO, RE, and MI. These correspond to the Physical Body, Vital Body, and the principle of Soul (given by the note MI), accompanied by a personality with which we develop in the physical world.

We are born, grow, reproduce, grow old, and die without any true objective. In this state will be all of humanity, while it does not find something that allows it to overcome this First Pause.

From the moment it reaches MI, either it continues to rise, or it returns to the starting point. In the last of these cases, the Law of Entropy will equalize us in the cemetery, and we shall have to return again and again until exhausting the 108 physical bodies that we have by Law. Here we find the so-called Men of the Third Day, seen in the light of Genesis — fascinated with existence, hypnotized and without even knowing the reason of their existence.

The Second Shock

If someone gives us the Knowledge, our existence will have a reason for Being. "Of a thousand who seek me, one finds me."

Once the Knowledge has been received, two paths open to us: we practice it and continue advancing, or we do not practice it and turn it into a belief.

"Of a thousand who find me, one follows me." Once the knowledge has been received, we must begin to create — in Sex, with the Creative Sexual Energy — the Solar Bodies in order to advance through the musical notes FA, SOL, LA. This implies the creation of the Solar Astral, Mental, and Causal bodies, or to make the First Mountain and become Men of the Sixth Day, according to Genesis. Men made in the image and likeness of God — the True Men.

But even so, one is not a God. It is necessary to overcome the Second Pause.

The Third Shock

To conquer the musical note SI, and this will imply dying in oneself, or making the Second Mountain. "Of a thousand who follow me, one is mine."

However, we still have to overcome the Third Pause. For this, it is necessary to conquer the higher DO, to attain the Second Birth, the Resurrection — and one cannot rise again without dying. This is the death of the Causa-causorum I-s, which must take place so that one can be born in the Spiritual World.

The Fourth Shock

This implies completing the Second Mountain and beginning the Third Mountain.

When the person succeeds in advancing from this lower DO to this upper DO, it is said that he has succeeded in BEING BORN for the second time. That birth, fundamentally, would be becoming Resurrected. The alternative is open for all Human Beings, but it is absolutely necessary that one know how to do the work and how to apply the Three Factors of the Revolution of the Consciousness:

- 1. **Birth:** First Mountain. Creation of the bodies, recovery of the Waters, Genesis.
- 2. **Death:** Second Mountain. Elimination of the defects, Apocalypse.
- 3. **Sacrifice for Humanity:** Third Mountain. Obtain a Disciple.

Law of Entropy

It is also called the "Law of Equalization."

Example: If we put a pot full of hot water next to another full of cold water, we see how entropy precipitates itself; there is an interchange of heat and cold. Finally, both remain equal.

Millions of people are in the path of entropy; because they do not work upon themselves, every day they become more imbecilic; the mind is going on atrophying; the centers of the human machine are each time more degenerated; all the organs of the brain no longer work for them; and at last there comes a day in which the Law of Entropy immolates them all in the Tartarus.

Have you not noticed how the Law of Entropy immolates the people? They can bury one in a coffin of gold and another in a coffin of wood, and however beautiful the sepulture, in the long run they remain equally bony.

All things are marked under the Law of Entropy; it is found in everything. The seas turned into garbage dumps. Polluted rivers, dying fish. Atmosphere contaminated by smog. The fruits of the earth adulterated. Behold the Law of Entropy.

Only through transformation is it possible to overcome the Law of Entropy, for transformation includes sacrifices — that is ostensible.

For example: if one sacrifices sexual desire, that force which through another force crystallizes its powers in us creates the Existential Bodies of the Being. If one sacrifices anger, the precious gem of meekness appears; if one sacrifices the craving for money, the unbearable greed, in one is born altruism; if one sacrifices envy, in one will be manifested the philanthropic energy, the desire to work for the neighbor, joy for the good of another. That is to say, there can be no transformation without sacrifice.

Thus also, for the man who sacrifices his sexual impulses, the result of that energy is the Creation of the Existential Bodies of the Being.

If the I-s are sacrificed, if they are all destroyed, the result of that sacrifice will be the liberated energy, which will give origin to the profound Interior Man. Then, one escapes from the degenerating entropy.

People do not really wish to sacrifice; they do not comprehend what sacrifice is.

It is clear; they could begin by sacrificing their feelings. I assure you that people are disposed to sacrifice their pleasures, even their vices and money — they would sacrifice everything — but not their sufferings and pains; they love them dearly.

If one begins by sacrificing the feelings, one can take a great step — overcome the Law of Entropy.

Who among you is disposed to sacrifice his feelings, to sacrifice himself for humanity? It is good to sacrifice ourselves for humanity. In reality, we do not sacrifice ourselves to behave badly.

We must never think of suffering. People base their experiences on their sufferings, on what happened to them in the bitter times; they enjoy remembering them. They say: "I went through such and such things in the street to be what I am." They feel important remembering them.

Sacrifice your sufferings; eradicate from yourselves the I-s that produced them, and the sufferings remain sacrificed — for the I of the sufferings must be eradicated. The energy that results from there is transformation, for there is born in one a different man, and he overcomes the Law of Entropy.

Law of Octaves and Law of Entropy Law of Octaves Today we are going to study this Law and its opposite — the Law of Entropy — which govern all of nature.
