We are going to see this topic, which is important for the work of Alchemy; what we are going to see, and what you are studying, is definitive. Undoubtedly, Chastity is exactly the opposite of lust — the opposite, the totally opposite of the development of lust.

Diverse Types of Lustful I-s

We are going to see this topic, which is important for the work of Alchemy; what we are going to see, and what you are studying, is definitive. Undoubtedly, Chastity is exactly the opposite of lust — the opposite, the totally opposite of the development of lust.

We are going to speak of fire. Fire has two aspects: one aspect that is given by the KUNDALINI, and another aspect is the KUNDARTIGUADOR. These two are totally opposites. The word KUNDALINI refers to fire ascending victoriously through the spinal medulla. Kundartiguador means fire descending into the atomic hells of the Humanoid.

We already know that the Creative Sexual Energy creates; its function is to create: with an ovum and a sperm it reproduces the species. The other spermatozoa that participate in the copulation also create — the psychological aggregates. When the seed was spilled, all the I-s or psychological defects were created.

There exist three types of sexology:

- 1. **Supra-sex:** Superior sex, regeneration, creation of the Children of the Light.
- 2. **Normal Sex:** Generation, Reproduction of the species without fornication.
- 3. **Infra-sex:** Degeneration, Reproduction of the Ego with fornication.

Why do we have to study the lustful I-s?

- 1. We need to attain chastity, so that there may be power and creation.
- 2. We need to rescue the trapped fire that is in each one of the lustful I-s, so that there may be birth.
- 3. We need the practice of sex to be each time more pure.
- 4. The work upon these I-s is directed by the Divine Mother.
- 5. The work must be done through intimate Self-reflection.

- 6. Each comprehension allows us to unfold ourselves into Observer and Observed.
- 7. In some I-s we see the process of psychological death, and others are thrown into the Abyss.
- 8. The work on the large I-s makes part of the black mercury become white.
- 9. The work with the little details makes the sulfur appear, fecundating the mercury (Fire of the votive candles).
- 10. When the defect is fully comprehended, the red mercury appears and the river of blood is seen.
- 11. The single ones who have no partner go on leaving the pile of bones for when the dog arrives, that he may eat them.
- 12. The lustful I-s impede Concentration, imagination, and will.
- 13. The process of regeneration begins with the disintegration of the defects we know we have.

- 14. We shall attain greater sexual potency.
- 15. In Alchemy, this process is called "whitening the brass."

How many times did I fornicate, and in what form?
